

+Tufftalk Lite Headset Features Instructions

Power On / Off

- Power On: Hold down the Center Button and the Plus (+) Button at the same time until the blue LED appears. You'll hear a voice prompt say **"Hello"**. The red LED will flash a certain number of times to indicate the battery level.

4 flashes = High, 70% ~ 100%

3 flashes = Medium, 30% ~ 70%

2 flashes = Low, 0% ~ 30%

When you power on the headset, keep holding down the Center Button and the Plus (+) Button for about 3 seconds until you hear high tone triple beeps. You will hear a voice prompt indicating that the battery level is High, Medium, or Low.

- Power Off: Hold down the Center Button and the Plus (+) Button at the same time until the red LED appears. You'll hear a voice prompt say **"Goodbye"**.

Two-Way Intercom Group Pairing Procedure

Talk to your fellow workers over the intercom in full duplex using Bluetooth by pairing them together. Once paired together, you can connect or disconnect the intercom. You can pair 2-4 Helmets together.

- **Procedure to Pair #1 and #2 Helmets**

- On the #1 helmet, hold down the Center Button for 5 seconds until you hear the voice prompt say **"Intercom Pairing"** to place the Tufftalk Lite into Intercom Pairing Mode.
- On the #2 helmet, hold down the Center Button for 5 seconds until you hear the voice prompt say **"Intercom Pairing"** to place the Tufftalk Lite into Intercom Pairing Mode.
- When both helmets are Intercom Pairing Mode and the LEDs are flashing red rapidly, tap the Center Button once on either of the helmets.
- The LEDs will change to flashing blue slowly on both helmets at the same time.
- Tap the Center Button once on either of the headset/helmets to disconnect the intercom.

- **Procedure to Pair #1 and #3 Helmets**

- On the #1 helmet, hold down the Center Button for 5 seconds until you hear the voice prompt say **"Intercom Pairing"** to place the Tufftalk Lite into Intercom Pairing Mode.
- On the #3 helmet, hold down the Center Button for 5 seconds until you hear the voice prompt say **"Intercom Pairing"** to place the Tufftalk Lite into Intercom Pairing Mode.
- When both helmets are Intercom Pairing Mode and the LEDs are flashing red rapidly, tap the Center Button once on either of the headset/helmets.
- The LEDs will change to flashing blue slowly on both helmets at the same time.
- Tap the Center Button once on either of the headset/helmets to disconnect the intercom.

- **Procedure to Pair #1 and #4 Helmets**
- On the #1 helmet, hold down the Center Button for 5 seconds until you hear the voice prompt say **“Intercom Pairing”** to place the Tufftalk Lite into Intercom Pairing Mode.
- On the #4 helmet, hold down the Center Button for 5 seconds until you hear the voice prompt say **“Intercom Pairing”** to place the Tufftalk Lite into Intercom Pairing Mode.
- When both helmets are Intercom Pairing Mode and the LEDs are flashing red rapidly, tap the Center Button once on either of the headset/helmets.
- The LEDs will change to flashing blue slowly on both helmets at the same time.
- Tap the Center Button once on either of the headset/helmets to disconnect the intercom.

- **Procedure to connect all helmets**
- Once Headsets on helmets are initially paired there is no need to re-pair them after headsets are powered off. Pairing is stored in Memory on each headset. Power on all four headsets: Hold down the Center Button and the Plus (+) Button at the same time until the blue LED appears. You’ll hear a voice prompt say **“Hello”**. The red LED will flash a certain number of times to indicate the battery level.
- Tap the (+) Button and the (-) Button on Tufftalk Lite Head Set/Helmet #1 at the same time to activate Group Intercom and connect all 4 headsets together for a Four-Way Intercom conference. (It is advised to use a sharpie marker to designate helmet/headset #1)

If #1 headset/helmet disconnects the whole group disconnects.

Once paired together, #1 helmet can connect or disconnect the intercom with a specific helmet by tapping the Center Button a specific number of times for a 1-to-1 conversation.

#4 helmet = 1 tap

#3 helmet = 2 taps

#2 helmet = 3 taps

#4 helmet, #3 helmet or #2 helmet can connect to #1 helmet by tapping the Center Button once for a 1-to-1 conversation.
